Quality of services integrated with years of industry experience, make us the perfect choice to partner with in order to produce an outstanding end results

Our Approach

Supply Chain Management is a new concept of business management

Supply Chain Management

SCM is the integrated planning, co-ordination and control of all business process and activities in the supply chain to deliver superior consumer value at less cost to the supply chain as a whole whilst satisfying requirements of other stakeholders in the supply chain (e.g. government and NGO's)

The profitability of the supply chain could be improved drastically via better delivery performance and is based on the reduction of inventory-carrying (reduced overstocks, faster inventory turns) and transportation costs (pooling of transport), the reduction of indirect and direct labour costs. Increase of sales and sales margins.

Logistics Management

Elements of Logistic Management

- Logistics and Maintenance Support Planning: ...
- Logistics Maintenance and Support Personnel: ...
- Training and Training Support: ...
- Supply Support—Spares or repair parts and associated inventories: ...
- Computer Resources: ...
- Technical data, Reports and Documentation: ...
- Maintenance and Support Facilities and Utilities:
